Cloud Controls Advisory

Solution Overview

Amdocs can help to design bespoke security controls that can best help your organization meet your organization and regulatory requirements.

$600B USD
lost annually to cyber security crime, globally.

Controls that work.

Using our decade of experience doing Cloud at Scale™ in highly regulated industries, our consultants are highly skilled in identifying gaps and designing controls that can effectively address them.

Controls are designed after a thorough evaluation of your organization's policies, procedures, and guidelines. After this, the controls are then assessed to determine the impact on existing workloads to ensure that things do not unexpectedly break. Then, our consultants will formulate a treatment plan detailing the solution to address your gaps, along with effort estimation for you to prioritize and plan your controls uplifting journey.

Motivation

- **Hardening your organization's security posture**
  Identify the security gaps within your organization and how to fix them.

- **Security controls to minimize risks**
  Reduce your risk posture by tightening your security posture.

- **Assurance in security practices**
  Establish confidence in your organization's cloud security practices,

- **Regulatory compliance requirements**
  Harden your security posture to meet organization and regulatory compliance.

Why Amdocs, Why Now?

Every year, the world economy loses $600B USD to cyber security crime, driven by increasingly sophisticated and well-organized adversaries. The average cost of a data breach now exceeds $4M USD, while regulatory fines for organizations not diligently protecting their clients' personally identifiable information (PII) can exceed $100M USD. With over a decade of experience in helping highly regulated industries deliver compliance, security, and governance, we understand the technical challenges that our clients face. Amdocs takes a holistic approach to tailor solutions that work with your business – across people, processes, culture, and tooling. Amdocs is here to help; contact us to learn more about our cloud security offerings.

Customer Benefits

- **Understand risks associated with Cloud infrastructure**
  Know what the threats are within your cloud environment.

- **Bespoke cloud controls to target risks**
  Bespoke security controls that are tailored to your organization's needs, according to your risk appetite.

- **Prioritization of your security roadmap**
  Plan for your security roadmap based on severity findings and effort estimation.

- **Achieve organization and regulatory compliance**
  Meet compliance standards and provide confidence and assurance in your organization.

Case Studies

Digital Bank

Motivation

Our Client was launching a digital bank in-order to make financial solution more accessible and safer to communities historically underserved by the banking sector.

The client wanted to achieve all necessary security standards within a compressed two-month timeframe, obtain banking license in time for scheduled launch and ensures ongoing platform compliance through automation and self-correction.

The client chooses Amdocs to tap into its cloud, financial and regulatory expertise for a successful launch.

Solution

At the start of the engagement the Amdocs team immediately conducted a thorough review of the security workstream.

The team reviewed the regulatory requirements and enhanced them with industry best practices along with Amdocs own long experience with financial services industries was able to quickly determine the baseline and target compliance posture.

This allowed to focus activities on critical gaps to be closed to meet the timeline.

Impact

Thanks to a 100% uplift in security posture and a 100% increase in security observability, the bank met all compliance obligations and launched on time.
