

Modernize banking technology from the core to the customer

Empower the business to reinvent banking

How can you surpass the competition? Empower your team. They have promotion, product, and personalization ideas that will resonate with people. When your team tries more, they uncover winning innovations, unlocking a tailored product experience akin to private banking for every customer.

Inefficient processes and antiquated legacy technology prevent this vision from becoming a reality. There's a significant gap between your business goals and your technology. At Amdocs, we eliminate that divide, helping you free your organization from constraints on innovation on the front end and modernize your systems on the back end. GenAI, dynamic product management, and automation combine to fuel breakthrough growth and efficiency.

Gain no-code speed

Amdocs empowers banks and other financial service providers to:

- **Liberate and accelerate the business:** Speed time to market by freeing business managers to launch new offers themselves.
- **Forge a better you:** Harness the power of GenAI to boost performance and keep accelerated tasks aligned.
- **Grow revenue:** Explore unlimited product personalization and innovation options.
- **Reduce barriers and costs:** Shift away from inflexible systems as you expand automation.

GenAI at scale

You scale GenAI rapidly with a unified framework and tech stack engineered for a highly regulated environment. GenAI co-pilots provide instant, accurate, and compliant guidance to your people, augmenting their talents to spark superhuman productivity.

Private banking for all

Every customer receives the exclusive-feeling product experience once reserved for only the wealthy. That happens when you bypass the core to launch personalized offers that reach across lines of business. Drag-and-drop tools – not code – and embedded compliance drive product management, letting you accelerate time to market from months to days – or minutes.

Rapid value-led modernization

Gain the non-stop agility needed to advance business goals when you modernize your mainframes and move to the cloud. Start with a more complete view of your current state with an AI-powered assessment. Transform faster with 100% automation of the migration process. You see measurable impact as you advance by following a roadmap built to deliver immediate and long-term value. Operational efficiency shrinks costs, as does the performance boost associated with self-service and AI-powered self-healing.

Define what's next

Amdocs engineers and deploys the foundational elements of modernized banking, including:

- **Amdocs Product & Pricing Catalog:** Accelerate time to market for products and promotions with a no-code approach that personalizes banking for customers.
- **Amdocs amAlz Platform:** Get started with an AI platform designed for regulated businesses, and accelerate time to value by selecting and configuring options from a use case factory.
- **Mainframe modernization:** Take advantage of fully automated code refactoring, testing, and migration, reducing migration time by as much as 90%.
- **Cloud at scale:** Move to the cloud with consistent, automated, and repeatable processes designed for banks and other regulated businesses.

Let's make banking amazing

At Amdocs, we've worked with more than 50 banks to deliver game-changing experiences to their customers and bring transformative levels of efficiency to IT.
